Videomedija je alternativna kulturalna manifestacija, koja ispoljava realan odraz društvenog stanja i pojedinca u odnosu na vladajuće sisteme i globalne politike a kroz savremene umetničke forme autora iz celog sveta. To je festival različitih percepcija i drugačijih običaja i kulture društva prvenstveno avangarde a prikazanih kroz različite nove alternativne umetničke forme.

U takmičarskoj selekciji preovlađuju umetnički radovi koji preispituju političke, društvene i kulturalne konstrukcije sistema. Umetničke konstrukcije kritičke i subverzivne aktivnosti kroz avangardne forme kojima se reaguje na zvaničnu ideološku doktrinu. Videomedija traga za umetnicima koji uočavaju onu skrivenu, drugačiju realnost, kulturu i umetnost, ukazuje na drugačije mogućnosti pokazivanjem razlika i preispituje etičke i estetske vrednosti.

Cilj jeste težnja za promenom individualne i društvene svesti, kao i ostvarivanje rezultata alternativnih stvaralaca u oblasti kulture i umetnosti. Video i nove tehnologije su odigrale presudnu ulogu u stvaranju nove masovne kulture i deluju van bilo kakvih okvira i tradicionalne kulture.

Podsticanje interesovanja za kritičkim mišljenjem i suprotstavljanje stavu da umetnička dela treba da pripadaju kapitalu, pošto su time dela sve udaljenija od samog umetnika i sve su manje umetnost.

Videomedēja is an alternative cultural manifestation, which presents a real reflection of social status and individuals in relation to governing systems and global politics through contemporary art forms of authors from around the world. It is a festival of different perceptions, different customs and primarily avant-garde social culture, shown through a variety of new alternative art forms.

In the selection phase of the competition artistic works that question political, social and cultural constructs are prevalent. These works represent critical and subversive activities through avant-garde form that reacts on official ideological doctrines.

Videomedēja searches for those artist that see this hidden, alternate reality, alternate culture and art, that indicate the different possibilities by pointing out differences and questioning ethical and aesthetic values.

Our aim is the need for change of individual and social conscience, as well as the realization of the results of our alternative creators in areas of culture and art. Video and newer technologies have a decisive role in creating new mass culture and act outside any framework or traditional culture.

We wish to encourage interest for critical thinking and opposing the idea that artistic works should belong to the capital, because this makes these works more distant from the artists themselves, and thus making them less art.
